

REDUCE CLEANING TIME BY AS MUCH AS 75%

A major problem faced by all rubber molders is mold fouling. This build-up of cured material and mold release agent causes blemishes and unwanted flash on the final part, making them unusable. To ensure the quality of the final product molds must be clean. Here are a few of the proven applications for Cold Jet Dry Ice Blasting:

- Injection Molding
- Blow Molding
- Tilt-back Press
- Lift Press
- Metal Bonded Mold
- Compression Molding

Cleaning hot and on-line will reduce production downtime.

Remove harmful release agents from rubber molds.

Clean hard to reach areas in tire molds.

- Eliminate production shutdown
- Eliminate disassembly of molds
- Non-abrasive: no mold erosion
- 24/7 Customer service and support
- Increase production time
- Environmentally Safe
